Dear Dean of Students,

Regretfully I am contacting your office in reference to a highly illegal, prejudicial, and egregious situation that involves the illegal use of my identity in your school, stalking, illegal training, behavioral modification, unwarranted invasion of privacy, and other situations that possibly have involved persons, students, and staff of John Jay. This has been the case for at least the past two years that I have lived in NYC. Iniding civil rights litigation based upon these accusations and others to include torture against several clandestine entities illegally operating within my area and possibly in your school who are now using my identity illegally within every database that I have existed in order to go through my past life, interfere with my future, intimidate, harass, annoy, and inconvenience me for their own benefit as part of this illegal system that is unfortunately being unleashed upon me. As part of this I have no civil rights, human rights, or common law rights, and I am being treated as if I don't exist as part of some coercive population technique that has me at the center of this. I have registered for classes successfully, but I am having issues with my email and have just changed my password at the school yesterday. I am unable to access my john jay email and your john jay system has my address as 45-31 162 st Flushing, but my CUNY Portal has my address as PO BOX 40965 Staten Island, NY 10304. There is something clearly amiss. I wish I was making this up but something is going on with my information. I believe that there are people operating within your school illegally, stealing information, and causing myself issues as

Subject: Delay of emails, career notifications, and censorship

Dear Sir or Madam,

I have contacted your office on several occasions in reference to several ongoing matters that involve John Jay students, staff, and possible law enforcement trainees and spies whom might be attending your school. I have notified that my emails I send from my John Jay email account are being censored. I have also noticed that the career notifications, my applications to certain positions are being delayed and possibly censored. I would like to discuss this issue and explain how it is a part of an ongoing conspiracy against myself and how it is connected with my daily struggles. I come to John Jay to learn, study, and to lift myself out of poverty not to be used in the same conspiracy and series of sting operations I am suing law enforcement in Federal Court about. I look forward to meeting and I hope you understand.

Sincerely,

Eric Perez

I made a notification to your office in reference to delays and censorship of my john jay email account, and someone illegally monitoring me electronically while logged in to john jay computers. This is being done in violation of laws and is also causing the theft and misuse of my intellectual property not to mention other information. I have been experiencing this since my enrollment and acceptance. I was informed by Rachel to contact you directly. I would like to schedule an in person meeting to discuss.

Mr. Wyatt,

I wanted to inform you that I believe that someone is somehow using my transcripts illegally. I believe that a spy ware program was placed on my thumb drive at the NY Public Library about 2 weeks ago, and it basically duplicates certain files. I don't know exactly who could be doing something like this, but anything having to do with school I will notify you. As we have discussed I don't have a clue who would want to be me at this point but it has to do with some program that they are running with the Commis or something. This has been an ongoing situation as we discussed and they have even duplicated or substituted MRI results as well as other identification to perpetuate this. I know you only have jurisdiction over John Jay matters so I am informing you of the transcript. I attempted to take the spy ware off the thumb drive but I have too much on it to lose the information. Sorry for the inconvenience.

Eric Perez

Ms. Mason,

Congratulations on reaching such a high position at the DOJ. It must have been a great honor to work besides Mr. Obama and other champions of change. Things have changed for many Americans and persons here from other countries legally and illegally for the better, but the problem is that things have only gotten worse for Eric Perez even though I hold two jobs. I am an honorably discharged Marine, father, business owner, and hopefully student. I have been illegally incarcerated twice, maliciously prosecuted, injured, and hunted inside jail and outside just as many people have. Fortunately, I am living to tell my story, but many people are still in my way and being allowed to do so with the cooperation, collusion, and acting in concert with law enforcement personnel and thousands of informants. My nightmare started long ago with the murder of my mother and the death of my best friend. Someone has engineered Eric's life to be a disaster zone, even though Eric does not affiliate with anyone. To be honest I figured this out a very long time ago and have mastered the tactics, methods of control, and the groups being used to restrain, harass, intimidate, inconvenience, and ultimately cause my death. The most disgusting part about this is the amount of cooperation these oppressors and clandestine elements whom are mostly foreign are receiving from the local populations and the law enforcement community. I have been what they call a world wide systemic for a very long time, and have been used in a very complex personnel orchestration using a variety of media groups, Youtube companies, and Production companies. The real issue at hand is that I am being used as an inanimate object and have no civil, common law, or human rights and am not recognized in any official capacity by the US government due to the fact that this constant mistreatment of Mr. Perez has become the Unofficial Custom and Policy of the United States Government. The same persons under the color of law, religious elements, and foreign services, and even your favorite entertainers have commercialized my life and using concepts such as the third person torter, ripple effect, deliberate indifference, and criminal law enforcement they have targeted myself and my children making us live under intimidation, violence, and fear as part of a scheme that I have been used for for a very long time. They have made an economy out of my mistreatment and engineered violations, Civil rights cases the obstruction and engineering of those cases, the engineering of every situation; person I have come in contact with, and each situation from inside jail & prison to the present point. The same law enforcement that have tried to murder me in prison and used me and my children as entertainment in various ways are now surrounding us each day and placing us in dangerous situations by engineering our environments and targeting us through physical, electronic surveillance. They censor anything I do on the internet and program their CEO friends and company owners against me so that I can not become successful. They use me in an orchestrated struggle between groups and a pawn, and have been doing so for a very long time. The same people who have cost me my life have been paid large sums of money over the years to engineer and move people whom have instructions about me into my area. They have arranged hanging skits, assaults, and other scenarios with the radio stations in Tampa Bay and other shows in NYC. This is the same way that they used to hunt slaves in the South for years and how so many people have lost their lives. I have been placed in a cointelpro area in Staten Island where I am under surveillance from the same forces who have been using my hunt, defamation, harassment, intimidation, censorship to include: mail, internet, social media, and redirection of phone calls to control anything I do so that illegals and others participating in this can use my hard work, intellectual property, personal information, invention idea, patent, business paperwork, and anything else in their own lives to obtain financial gain from clandestine agencies, religious organizations, and even entertainment groups. They have placed me in a house with wires in the wall and have eavesdropping equipment and at times secret cameras in my apartment. I took this apartment after becoming homeless in 2015. I believe Ice and other agencies working together with several groups in the area have engineered my upstairs neighbors who act out upon orders and perform domestic violence skits, have sex at certain times, and are charged with assisting the spies that come in and out of my apartment who take shifts in the basement. These people have access to my WiFi, Con Edison Account, Bank Account, DMV records, military records, and anything else you can think of. They are surveilling me en masse on foot and car and track me through my phones that I have purchased in stores. They have clones of my phones immediately after I purchase. The places I am employed are also set up as the same law enforcement and spies monitor me their as well and arrange harassment, intimidation, inconvenience, and mistreatment and scenarios that everyone participates and acts in. Nobody will ever explain or tell me what is going on or really going on due to the fact that arrangements have been made between all sides. I have seen actors such as Tom Cruise, Vin Diesel, actors from 13th Hour, my favorite Denzel Washington, Marcus Latrell, Kevin Gates, Immortal Technique, Ebro, Laura Styles, and anyone else you could think of out here in Staten Island within a few blocks of my residence. I even saw Michelle O'Bama and here recordings of voices such as O'Bama. I have seen high profile snitches such as Sammy the Bull and others that I wont mention. These people have made the engineering of my death and oppression their job, and have enforced the indifference and unofficial policy that this is okay. I have made two civilian criminal complaints that have been obstructed, emailed the doj in reference to a biological agent sprayed on me, attempted to make police reports about people in the basement. My landlord is in on this whole thing and works with the

NYPD. I heard him reciting a line in the Federal Building while mailing a letter to the DOJ Ig and other places. These people have let Russians and other subversives from Europ and South America direct access to my email, phone, medical, dna, blood work, bank information, military information, and have done the same to my daughter. They have threatened to rape my daughter as well and play along with the various skits and shows that I am not allowed to listen to on the radio of television. Its called a Coercive Population Control Program. I have received no response from the DOJ in reference to my complaints due to the fact that the indifference to the violations have become a paycheck. These people stay on this block and surrounding blocks and come from thousands of miles to stalk, harass and entertain themselves with me. The NYPD is tracking me everywhere as well and using illegal tactics to intimidate me and make me feel threatened for my life as well as other persons involved. I am sick of this to say the least and need assistance. This has gone on too long. I also need assistance with processing my financial aid as t they state they will not process it and the fact that my internet and computer are illegal tracked and censored from a remote location I am unable to access my CUNY First account. I do exist and this straw man concept is sickening. I would appreciate anything you could do and a meeting if possible. I look forward to attending and truly making the change in society needed.

To whom it may concern:

I have had several issues logging into my email that has delayed responses to certain persons. I am also receiving mail and notifications on the career site the day after they are posted. I don't know if this is being done deliberately as part of an ongoing adversarial system that I have been the subject of and have multiple lawsuits in Federal Court about or if someone at MIS or the friends of these conspirators involved in this against me are continuing this adversarial system upon orders but I would like to enlist your assistance in helping me. I do not want to add CUNY John Jay to a long list of defendants. I have a long list already and I don't want to have an adversarial relationship with a college that is supposed to be neutral and fair to all who attend. I hope you can assist and I can attend school as everyone else who had been accepted does.

Sincerely,

Eric Perez

Deprivation of rights and engineered discrimination at John Jay

Dear Sir or Madam:

I am a returning adult transfer student (sophomore) and Marines Corps veteran attending John Jay. I have contacted the Dean of Students Office here at John Jay on several Occasions due to an ongoing situation concerning several ongoing companies and groups that have systematically targeted me. A pattern of this treatment which includes several clandestine groups whom are ultimately under the color of law and third parties whom are operating under the premise that I am their target. I don't know the email privacy clause or the policies on electronic or physical surveillance within CUNY but I do know that generally no entity is allowed to illegally monitor anyone without a warrant or an official mandate. The most recent interview and tactic of this company as I have known to call it is that I was targeted for an assault after leaving the building. Now these people pulled up acted like they were going to do something and then got back in their truck, but you get the gist that these individuals are practicing using my harassment, intimidation, and illegal surveillance. This also includes the monitoring of the John Jay email, engineering personnel switches, and other tactics and then deny. I did not enroll in this college to be used in any way, shape or form. I have reached out to the Dean of Students and have received no response. This has been an ongoing situation engineered by a combination of law enforcement and other groups who have continuously used me as part of the "Prism " Program, a neutral party whom is involved with nobody or nothing but made to look as I am involved with everything, defamed, and indirectly harassed using several law enforcement doctrines: the third person tort, commercialization, and stalking. This is an ongoing orchestration and involves my data breach, inconvenience, unequal protection of the law, and mistreatment by the same personnel over a number of years. I understand your jurisdiction is College and not the street, but I should not feel any way but motivated, studious, and safe in my school. These personnel are granted illegal access to campus and obviously my information. The main idea is to create faceless enemies and believe that certain acts are not centered on this student's assault, unequal protection or embarrassment. I do understand that this is a law enforcement college but if law enforcement and colleges are allowed to act adversarial towards US citizens and persons attempting to obtain a degree then what is next. I would like to file a formal complaint with your office in reference to this situation. I have studied this program, the tactics, and behavior of the active participants whom have created a world of fiction and various verses and lives for years. As stated please provide information on how to file a complaint. I hope to pursue my degree and continue to be a positive member of society despite the mass ignorance and population coercion and segmentation I have experienced engineered by some of the most ignorant intelligent people acting in collusion.

Sincerely,

Eric Perez

Dear Sir or mam:

I have not received a response to my communication in reference to an engineered conspiracy possibly originating and being directed from one of your CUNY schools where I believe I have been targeted by various groups engaged in seditious and malicious activities against not only myself, but using me as an object of abuse and spying for the engineers of this plot, essentially using me as practice and an example. These groups involve religions that are involved with white supremacy and the occult as well as communists and others to include law enforcement engaging in a practice of discrimination and hate as practice. It is evident that John Jay is not a fierce advocate of justice or anything else. I would like to speak to someone in reference to this situation. There are spies in this school and employees who are illegally using my illegally gathered information to engineer scenarios and influence events on the outside of this school and these are indisputable facts. Your offices lack of response also implies your collusion and complacency with this situation and makes this look as if it is a common practice and illegal policy across CUNY itself. If you are treated as is you are in a prison cell and are made to accept the same liberty and deprivation issues in regular life as you are subjected to inside prison than this is a huge issue, and I will take legal action. I look forward to your response.

Sincerely,

Eric Perez
